MONEY

The life cycle costing technique helps to reduce the overall cost of a project by selecting best alternative designs and components to minimize the cost not only at the time of construction, but also the over the full life of the project. In resultant we save the money.

MACHINE

Using appropriate machinery and its proper maintenance make a valuable difference in terms of project progress and cost saving. It plays an important role in the construction industries by reducing the time of work which increase the progress of project and it saves the money .

www.civileano.com

METHOD

A Method statement is a safe work method statement or procedure prepared especially for high risk task, it highlights the various tools, machinery, personnel and step by step process of getting the work done. Method statement is part of the safety requirements on site, and are usually approved by the consultants / contractors before such high risk work are carried out.

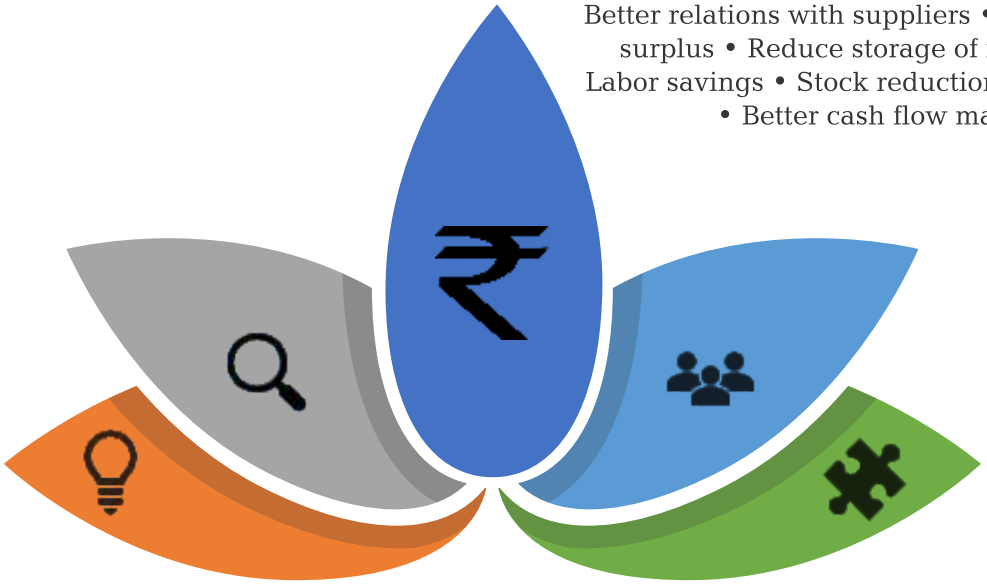

MAN

Manpower Planning which is also called as Human Resource Planning consists of putting right number of people, right kind of people at the right place, right time, doing the right things for which they are suited for the achievement of goals of the organization.. Human Resource Planning has to be a systems approach and is carried out in a set procedure. The procedure is as follows:

- Analyzing the current manpower inventory
- Making future manpower forecasts
- Developing employment programmes
- Design training programme

MATERIAL

An effective material management system can bring many benefits for a company. Reducing the overall costs of materials • Better handling of materials • Reduction in duplicated orders • Materials will be on site when needed and in the quantities required • Improvements in labor productivity • Improvements in project schedule • Quality control • Better field material control • Better relations with suppliers • Reduce of materials surplus • Reduce storage of materials on site • Labor savings • Stock reduction • Purchase savings • Better cash flow management

HOW WE WORK

Team dynamics are tailored to best suit each project based on relationships, experience, skills and time, because we feel it is the right people who make the difference to the success of our projects. At CECPL we believe that the success of any project commences with understanding of individual strengths and the formation of a compatible, committed and well resourced construction team that understands the requirements and anticipated outcomes. Consideration is also given to the construction team's ability to function collaboratively within the Project Control Group. We have formalized many management processes into our project management and quality assurance systems in order to better integrate and transfer information between disciplines and groups.

CECPL
Experience With Excellence

PROJECT MANAGEMENT SYSTEM

www.civileano.com

The management processes commence with understanding the works, the achievable time-frames and the conditions under which the works are performed. To achieve this we perform the following activities prior to commencing with the tender preparation:

1- Site Inspection Report

2- Site Dilapidation Report

3- Formal review of the documentation with our estimating and construction staff

4- Preparation of a tender programme to ensure that the process is tracked and the anticipated deadlines are managed

5- Construction programme is prepared by the Planning team to fully comprehend the time frames, critical activities and their interrelationships.

Once the works are procured through tender or negotiation we immediately undertake a thorough risk analysis and prepare a comprehensive construction programme, detailed scopes of works are and letting of contracts commences according to the critical path and risk requirements.

We ensure that our project manager has the opportunity to influence the letting process to sub contract and supply contractors to enable him to structure a harmonious and effective team. Our Project Manager provides input and scrutiny into the sub-contract scopes of work to ensure that he is fully briefed on the works to be performed by the various sub-contactors. Weekly internal, contractors and sub-contarctors meetings are held where updated programme are distributed, time frames are discussed, problems resolved and an appreciation for the following trades is communicated. At this meeting Health and Safety, Environmental and Quality matters are also discussed and minuted.

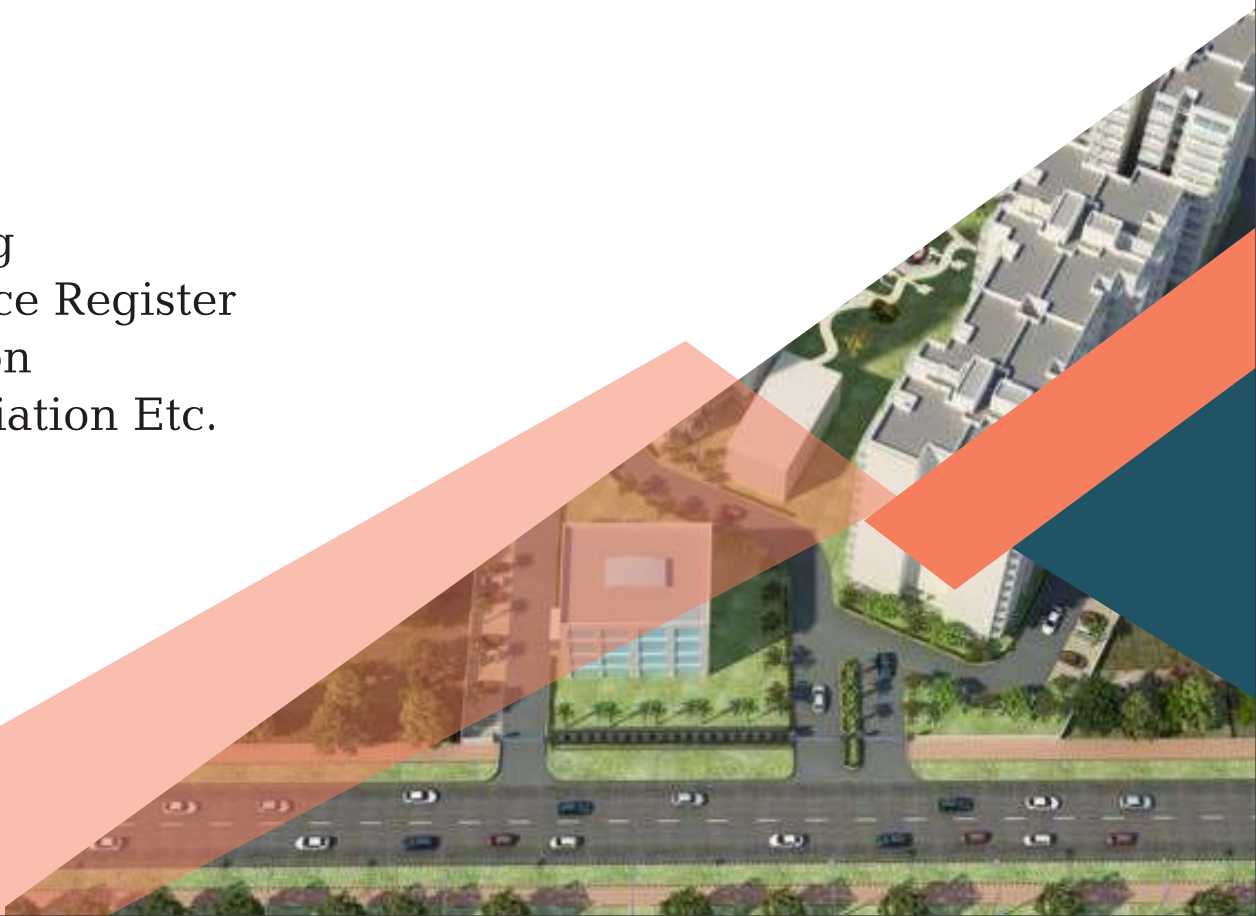

CECPL
Experience With Excellence

OUR RESPONSIBILITY

www.civileano.com

We understand our client's requirements to control expenditure within the budget anticipated at the commencement of the project and to this end we continually value engineer all aspects of the construction, offering alternative solutions where practicable. Our Construction Managers attend most site meeting to ensure that we achieve our client's expectations and that we establish lasting and valuable relationships within the community and the Project Control Group. We are committed to provide the high class services with combination of experience team and introduction of new techniques and methods, which will leads us to the glorious path of success.
